LASERNET

Benefits with FormPipe LaserNet

- » **Save money on the bottom line.** Send business documents automatically and electronically and save on paper, toner, printers and staff time.
- » **Adapt to your customer's requirements.** Deliver business documents in precisely the format and layout your customers require.
- » **No costly programming in Microsoft Dynamics AX** - maintain your own reports and save the consultancy fee.
- » **Save money when upgrading to the next Microsoft Dynamics AX version.** Reports are updated in a matter of hours instead of spending 1-5 days per report.
- » **Free up the resources in the IT department:** Make design changes and set up reports using FormPipe LaserNet. Maintain formats and content directly from e.g. MS Word.
- » **Find your documents.** Full archive of business documents in Microsoft Dynamics AX.
- » **Save on hardware.** You need fewer printers and your consumption of toners and paper is reduced dramatically.
- » **Support your company's corporate identity in documents and reports.** Check layout with the print preview function and be in control of your corporate image.
- » **Get ready for tomorrow's requirements on documents.** FormPipe LaserNet can be adapted to all kinds of business areas, legislative scenarios (EuroSox, Sarbanes Oxley, Basel II) and countries - today and tomorrow.

Regardless of the Microsoft Dynamics AX version of your organization, this Connector is an agile and effective work tool for working with your Microsoft Dynamics AX reports and documents, ramping up the power of your Microsoft Dynamics AX in many ways:

This module gives you access to a long range of preprogrammed menus and templates as well as a user interface in Microsoft Dynamics AX. Thanks to the close integration, a lot of reports can be set up and generated very quickly by the user, and the module also supports XML enabling.

Achieve streamlined and focused communication with customers, partners and vendors when your company delivers uniform, professional-looking and individual business documents as PDF, e-mail, letter, fax, etc via FormPipe LaserNet:

Concept

Set up a solution where *customer A* receives an invoice as a PDF attached to an e-mail, and *customer B* receives an invoice as a fax, or some other preferred output format.

At the same time, FormPipe LaserNet can archive a copy of the distributed document in a locked PDF format (a legal storage format for invoices) in a folder in Microsoft Dynamics AX. Other preprogrammed templates for the Connector includes:

- » Invoice/Credit note;
- » Statement of account;
- » Order confirmation, Quotation
- » Delivery note/Packing list.

Take your business communication and possibilities to a new level with the FormPipe LaserNet Connector for Microsoft Dynamics AX!

Facts about business communication today

Business documents such as invoices, statements of account, order confirmations, etc. are vital for your company's communication with customers, suppliers, authorities, and partners.

FormPipe LaserNet ensures that the design, form, and media of each business document correspond with the requirements for individual, modern, proper, and user-friendly documents needed by the external environment

Also, new forms and media are continuously changing the way we create and communicate business documents. FormPipe LaserNet Input and Output Document Management meets the varying customer demands regarding business documents.

Integration and possibilities

As a fully integrated module in Microsoft Dynamics AX, it is easy for the user to work with each sales order, invoice etc., regardless of output format (PDF, print, OIOXML/OIOUBL, fax, etc.).

Distribution rules are set up for each customer account, but can be changed manually if needed. This ensures maximum reliability (the customer receives business documents in the preferred format) and maximum flexibility (the format can be changed on individual documents with a few clicks):

All changes are managed from Microsoft Dynamics AX, and they stay there - making upgrades to a newer Microsoft Dynamics AX version a much easier job than before. All documents can be viewed in the print preview function (incl. logo and overlay), and it is possible to keep track of changes via the log function:

The Connector has been developed for Microsoft Dynamics AX versions 2009 and 2012. The Connector only supports FormPipe LaserNet version 6.6 and newer.
