OptiDoc for Dynamics AX

## LaserNet OptiDoc for Dynamics AX

If your company employs Dynamics AX as your ERP system, LaserNet OptiDoc for Dynamics AX is a flexible and effective work tool especially designed for you.

Document design, handling and distribution becomes an easy task with LaserNet OptiDoc for Dynamics AX, because this module ensures a complete integration between LaserNet and Dynamics AX.

As a consequence, your communication with customers, partners and vendors can be streamlined and focused, making your company capable of delivering uniform, professional-looking business documents as PDF, email, letter, fax, etc. Your benefits are:

- » No costly programming in Dynamics AX
- » Save maintaining in Dynamics AX
- » Easy and quick to set up
- » A solution that can be adapted to all kinds of business areas and countries
- » Maintain overlay directly in MS word

When installed, this module also gives you access to a long range of preprogrammed menus and templates as well as a userinterface in Dynamics AX. Thanks to the close integration, a lot of reports can be set up and generated very quickly by the user, and the module also supports XML enabling. Moreover, it is a hassle-free task to migrate to a newer version of Dynamics AX, when this need arises. These are all functions that can help your company save both time and resources.

The solution also boasts:

- » A preview-function that makes it possible to view the documents before updating and sending them (see screenshot below)
- » File archive for printed documents that can be opened and read directly from Dynamics AX

FormPipe Software (Publ)

FORMPIPE

- » The ability to employ many different output channels (paper, e-mail, fax, XML, UBL, PDF, etc.)
- » Handling of document distribution through Dynamics AX - this ensures that customer A can receive a fax while customer B gets a PDF file attached to an e-mail
- » Business logic stays in Dynamics AX

### **Technique, systems and integration:**

LaserNet OptiDoc for Dynamics AX has been developed for AX versions 2.5, 3.0, 4.0 and AX2009. A regular, "raw" print can be (mass) printed in any format – directly from Dynamics AX. Thus, an invoice automatically can be sent as print, fax, or email. Regardless of the document format - print, PDF via email, fax, oioXML, ebXML, or fax – they can all be managed directly from the debtor/creditor card in Dynamics AX.

A LaserNet solution tightly integrated with the Dynamics AX menus makes the management of Dynamics AX documents a simple and easy experience. For more information about the LaserNet OptiDoc for Dynamics AX module, ask your reseller for the technical manual about LaserNet OptiDoc for Dynamics AX.

The laserNet OptiDoc solution has been developed in cooperation with the LaserNet partner Optimate.

FormPipe Software AB (publ) is a software company in the field of Enterprise Content Management (ECM). We develop ECM products for structuring information and supply them to major companies, authorities and organizations.
