## SpoolQ 2.0 C(H) Group Queue Quick Release

Type: SpoolQ Update  
Software Affected: SpoolQ Install / SpoolQ Trial  
Hardware Affected: None  
FunAsset Contact: Mark Dowson / [mark.dowson@funasset.com](mailto:mark.dowson@funasset.com)  
Further Reference: SpoolQ User Guide / Technical Reference Manual

---

### Updates

SpoolQ 2.0 C(H) has the following updates:

- Group Queue Quick Release

---

### Group Queue Quick Release

Group Queues within SpoolQ have been updated to release attached jobs to the Print Queue considerably quicker than before.

It became apparent that some users who were sending large numbers of small jobs were having to wait just a bit too long before each job was released to the Print Queue. This is because the Group Queue had been set-up to check and then pass a single job to the Print Queue at intervals of up to ten-seconds. Another ten seconds could pass before the queue was checked again, resulting in considerable delays when processing large numbers of small jobs.

SpoolQ version 2.0 C(H) and above removes this delay by simply passing multiple jobs from the Group Queue to the Print Queue instead of just the one.

---

### Availability

In order to take advantage of the updates mentioned above, please download the latest SpoolQ run-time or SpoolQ Trial from the following URL:
