SpoolQ 2.0 C(J)

Case Issues with Queues

| | |
|--------------------|--|
| Type: | SpoolQ Update |
| Software Affected: | SpoolQ Install / SpoolQ Trial |
| Hardware Affected: | None |
| FunAsset Contact: | Mark Dowson / mark.dowson@funasset.com |
| Further Reference: | SpoolQ User Guide / Technical Reference Manual |

Updates

SpoolQ 2.0 C(J) has the following updates:

- Case Issues with Queues

Case Issues with Queues

Queues within SpoolQ have been updated to correctly handle names with lower-case characters.

Previously queue names created with lower-case characters would default back to upper-case following a restart of SpoolQ. In addition to this the Hold/Release status of the queue would be lost, and in the case of Group Queues a Clone or Split status would revert back to the default Share status.

SpoolQ update 2.0 C(J) and above removes this problem.

Availability

In order to take advantage of the updates mentioned above, please download the latest SpoolQ run-time or SpoolQ Trial from the following URL:
