SpoolQ 2.0 D(D) Client Server Technology

Type:	SpoolQ Update
Software Affected:	SpoolQ Install / SpoolQ Trial / Tasks (SpoolQ – SQUIxxxx / xxxxSQUO)
Hardware Affected:	None
FunAsset Contact:	Mark Dowson / mark.dowson@funasset.com
Further Reference:	SpoolQ User Guide / Technical Reference Manual

Updates

SpoolQ 2.0 D(D) has the following updates:

- Client Server Technology

Client Server Technology

SpoolQ has been enhanced with Client Server technology, making it an even more flexible and dynamic solution for any organisation involved in production printing.

Benefits:

- FunAsset's Tasks can independently process 'print' jobs when SpoolQ is not running. When SpoolQ is run, all outstanding jobs are automatically placed within the appropriate queue before being automatically or manually output.
- Different operator shifts are able to closedown and start-up new SpoolQ sessions without any interruption to data processing.
- A 'server' containing the Tasks can be housed within a secure room to prevent unauthorised changes. SpoolQ (the 'client') is then the only software that operators need to have access to.

Availability

In order to take advantage of the updates mentioned above, please download the latest SpoolQ run-time or SpoolQ Trial from the following URL:

http://www.funasset.com/support/software/funasset_applications.htm

You will also need to update each of your SpoolQ Tasks (SQUIxxxx / xxxxSQUO) to the latest version. Please contact FunAsset's Support Engineer, Gary Binding on + 44 (0)1460 57065 or by emailing gary.binding@funasset.com.
