SilentPrint 1.09

Pause/Resume Removal / Direct Raw File Processing / Text File Processing / Multi-copy Printing / Page Collation / OLE Timeout Extension

Type: SilentPrint Update
Software Affected: SilentPrint Install / SilentPrint Trial
Hardware Affected: None
Further Reference: SilentPrint User Guide

Updates

SilentPrint 1.09 has the following updates:

- Pause/Resume Removal
 - Direct Raw File Processing
 - Text File Processing
 - Multi-copy Printing
 - Page Collation
 - OLE Timeout Extension
-

Pause/Resume Removal

The output process has been made more efficient by no longer pausing and resuming the printer before or after outputting each document.

Direct Raw File Processing

Raw files can now be output directly to the printer, bypassing the printer driver. This is particularly useful for "print-ready" file formats such as PS, PRN and PCL.

An additional SilentPrint.ini parameter has also been added to determine whether raw TXT files should be processed instead of standard ones. Add the following to the [TEXT FILE OPTION] section of SilentPrint.ini:

```
Print Raw=YES
```

Text File Processing

An extra configuration option has been added so that text files can be output using MS Word instead of SilentPrint itself. Add the following to the [TEXT FILE OPTION] section of SilentPrint.ini:

Print Using MS Word=YES

Multi-copy Printing

Multiple copy printing can now be performed on GIF, JPG/JPEG, TIF/TIFF and TXT files when using a Job file.

Page Collation

When multiple copies have been defined within a Job file for GIF, JPG/JPEG, PDF, TIF/TIFF and TXT files that have multiple pages, the pages within each file are now collated and output together before the next job is processed.

OLE Timeout Extension

All OLE automation functions have been given an extended default timeout of 120 seconds. Add the following to the [MISC] section of SilentPrint.ini:

OLE Timeout=n

Where n is the number of seconds that Windows allows the called OLE function to complete before displaying a "Server Busy" dialog.

Availability

In order to take advantage of the updates mentioned above, please download the latest SilentPrint Install or SilentPrint Trial from the following URL:
