SilentPrint 2.04

PCX Processing / Deregister Facility / PLUS Functionality Failure (Job Files) / Action After Print Failure (Job Files) / Spaces in HTM Document Names / PDF Conversion Fixes

Type:	SilentPrint Update
Software Affected:	SilentPrint Install / SilentPrint Trial
Hardware Affected:	None
Further Reference:	SilentPrint User Guide

Updates

SilentPrint 2.04 has the following updates:

- PCX Processing
- Deregister Facility
- PLUS Functionality Failure (Job Files)
- Action After Print Failure (Job Files)
- Spaces in HTM Document Names
- PDF Conversion Fixes

PCX Processing

PCX documents are processed natively by SilentPrint Trial, Graphics, Office and Server.

Deregister Facility

A deregister facility has been added to enable licensed SilentPrint users to transfer their license to another PC.

SilentPrint can be deregistered by selecting the Deregister button found in the Register dialog (licensed installations only). Once confirmed, deregistration information is automatically copied to the Windows Clipboard and to a deregister.txt file found in the SilentPrint installation folder.

Before a new SilentPrint Licence Key can be issued, FunAsset must be provided with the generated deregistration information together with the Registration Code from the SilentPrint installation on the new PC.

PLUS Functionality Failure (Job Files)

The PLUS functionality, where another document is processed immediately after the previous one is passed to the Windows printer queue, now works when a Job file is used.

Previous SilentPrint releases, with the PLUS functionality enabled, would only start to process the next document listed in a Job file when the previous one had been completely processed by the Windows printer queue.

Action After Print Failure (Job Files)

The "Action After Print" facility now operates correctly following the failure of the last document listed in a Job file.

Previous SilentPrint releases moved the Job file to the Windows Recycle Bin irrespective of the action chosen.

Spaces in HTM Document Names

HTM documents with names containing spaces are now processed correctly.

Previous SilentPrint releases would occasionally fail if spaces in the document name were encountered.

PDF Conversion Fixes

Converting documents to PDF using the Adobe PDF Writer (Adobe Acrobat 6) or Adobe PDF (Adobe Acrobat 7) printer drivers now operates correctly.

Previous SilentPrint releases would have the following sporadic problems...

- TXT documents were left in ~Pending folder.
- "Save as PDF name" dialog remained on-screen.
- PDF documents created from HTM documents were assigned a strange name.

Availability

In order to take advantage of the updates mentioned above, please download the latest SilentPrint Install or SilentPrint Trial from the following URL:
