SilentPrint 2.20

SilentPrint Pro Added / Multiple Launches Allowed / PrintErrorPage / ASP, JSP and PHP Processing / Task Specific Page Orientation / PDF Pass-thru / Fit to Paper Fix / HTML Processing Fixes / PDF Copies Fix / Processing Delay Fix

Type: SilentPrint Update
Software Affected: SilentPrint Install / SilentPrint Trial
Hardware Affected: None
Further Reference: SilentPrint User Guide

Updates

SilentPrint 2.20 has the following updates:

- SilentPrint Pro Added
 - Multiple Launches Allowed
 - PrintErrorPage
 - ASP, JSP and PHP Processing
 - Task Specific Page Orientation
 - PDF Pass-thru
 - Fit to Paper Fix
 - HTML Processing Fixes
 - PDF Copies Fix
 - Processing Delay Fix
-

SilentPrint Pro Added

SilentPrint Pro is now available to buy and try. It is a Medium to high volume batch processing solution for small to medium enterprises and can be installed on a single server or networked PC to enable anyone within the enterprise to batch print or batch convert documents to PDF.

Multiple Launches Allowed

Two instances of SilentPrint Pro and ten instances of SilentPrint Server can be simultaneously run on the same PC or server to greatly improve document throughput.

PrintErrorPage

The facility to print an error page when using SilentPrint Pro and SilentPrint Server can now be turned on and off. This is achieved by defining one of the following parameters within the [MAIN] section of the SilentPrint configuration file, SilentPrint.ini:

| | |
|----------------------|----------------------------|
| PrintErrorPage = YES | Print error page (Default) |
| PrintErrorPage = NO | Do not print error page |

ASP, JSP and PHP Processing

ASP, JSP and PHP documents can now be processed by all versions of SilentPrint.

Task Specific Page Orientation

The facility to determine which page orientation (portrait or landscape) is used can now be defined on a per Task basis. This is achieved by defining one of the following parameters within a [TASK] section of the SilentPrint configuration file, SilentPrint.ini:

| | |
|-------------------------|-----------------|
| Orientation = PORTRAIT | Print portrait |
| Orientation = LANDSCAPE | Print landscape |

If no parameter and value is set, the default page orientation is determined by the Orientation value in the [MISC] section of SilentPrint.ini. If this is not defined the default orientation is portrait.

PDF Pass-thru

If a PDF document is detected by a Task configured to convert documents to PDF using Adobe PDF Writer or the Adobe driver, the document is passed to the location specified by Action After Print instead of being placed in an Unsupported folder.

Fit to Paper Fix

A fix has been made so the Fit to Paper = NO configuration parameter and value is not ignored. Prior to this the facility to disable scaling of all image documents (BMP, GIF, JPG, PCX and TIF) to fit the paper size was ignored.

HTML Processing Fixes

Fixes introduced to prevent SilentPrint from stalling and occasionally crashing when printing HTML files.

PDF Copies Fix

A fix has been made so the number of copies specified in a Job file for PDF documents is not ignored.

Processing Delay Fix

A fix has been made so processing is not “paused” for several minutes for HTML, PDF and PPT documents or when printing to file.

Availability

In order to take advantage of the updates mentioned above, please download the latest SilentPrint Install or SilentPrint Trial from the following URL:
