SilentPrint 2.30

Improved Watched Folder Response / Improved HTML Processing / Non-Alphanumeric Characters in Filename Extensions / Treat Files with No Extension as Text / Delay Fixed When Printing to File

Type:	SilentPrint Update
Software Affected:	SilentPrint Install / SilentPrint Trial
Hardware Affected:	None
Further Reference:	SilentPrint User Guide

Updates

SilentPrint 2.30 has the following updates:

- Improved Watched Folder Response
- Improved HTML Processing
- Non-Alphanumeric Characters in Filenames
- Treat Files with No Extension as Text
- Delay Fixed When Printing to File

Improved Watched Folder Response

SilentPrint now recognises supported documents more quickly after being pasted in a Watched folder. As a result, document processing times have been reduced.

Improved HTML Processing

The way SilentPrint processes HTML files has been changed so fewer timeouts occur.

Non-Alphanumeric Characters in Filename Extensions

Non-alphanumeric characters such as ~ and _ can now be used when specifying a filename extension for the Additional Text Files and Ignore File Types configuration file parameter values.

Treat Files with No Extension as Text

Documents without a filename extension that are pasted in a Watched folder are now treated and processed as text files instead of remaining untouched in the Watched folder.

Delay Fixed When Printing to File

The delay that occasionally occurred when printing HTML, PDF and WPD documents to file has been resolved.

Availability

In order to take advantage of the updates mentioned above, please download the latest SilentPrint Install or SilentPrint Trial from the following URL:

http://www.funasset.com/support/software/funasset_applications.htm

NOTE: Upgrading SilentPrint to the latest release will not affect your existing SilentPrint configuration.
